PROFILE SUMMARY

I enjoy designing digital products that simplify complex problems and make technology easier to use. Over the past 3+ years, I've worked on web and mobile experiences where I've collaborated with developers, stakeholders, and business teams to transform ideas into intuitive, user-centered solutions. I believe great design comes from understanding people, questioning assumptions, and continuously improving through feedback and iteration.

SKILLS

Product & Experience Design:

- UI Interaction Design
- UX Research
- Wireframing
- Design Systems
- User Journey Mapping
- Competitive Analysis
- Information Architecture

Kotlin (Jetpack Compose), Python, HTML, CSS, JavaScript, REST APIs, SQL.

Additional Skills:

Generative AI, AI-assisted prototyping, AI-assisted development.

PROFESSIONAL EXPERIENCE

UI/UX & Graphic Designer - CyberSec Consulting

Remote, India | August 2024 - Present

- Designed the UI/UX for a cybersecurity web product, simplifying complex workflows into clean, usable screens.
- Partner with stakeholders to design product experiences, presentations, and business communication assets.
- Create a consistent visual identity across products, marketing campaigns, and company branding.
- Built marketing creatives and landing pages to support the product launch.

UI/UX & Graphic Designer - Techmatic Systems

Hyderabad, India | November 2023 - July 2024

- Served as the primary UI/UX designer supporting multiple engineering teams across web and mobile projects, published on Play Store.
- Created user flows, wireframes, and high-fidelity screens tailored to each client's specific business requirements.
- Produced marketing creatives and branding assets alongside product design work, managing multiple projects in parallel under deadline pressure.

FOUNDER PROJECTS

SeekExperts (Local Services Marketplace)

Founder • Product Designer • Android Developer

Instead of waiting for a better local services platform, I built one.

- Turned a personal frustration into SeekExperts, a marketplace connecting customers with local professionals.
- Owned the entire product journey from UX research to UI, Android development, Firebase backend, and launch.
- Balanced user needs, business goals, and technical constraints while continuously improving the product.

OTHER PROJECTS

Inventory Management System for Civil

Designed dashboard experiences and management workflows focused on improving information clarity and operational efficiency.

E-commerce Website

Designed a responsive shopping experience with streamlined product discovery, browsing, and checkout workflows.
