FOUNDER SUMMARY

Founder and hands-on product builder working at the intersection of design and engineering. I created SeekExperts after repeatedly struggling to find reliable local service professionals through fragmented and unstructured platforms. I designed the user experience, built the Android application, and set up the backend myself, making practical tradeoffs to ship a usable product rather than chase perfection. I'm comfortable owning problems end to end and iterating quickly based on real constraints.

WHAT I'VE BUILT

- A live service marketplace where users post jobs, experts apply, bookings are confirmed, and reviews are managed.
- The Android application and Firebase backend powering authentication, real-time data, and media storage.

CORE SKILLS

Product & Design

UI/UX Design, Wireframing, Prototyping, Design Systems, Mobile App Design, Web Design, Productive Thinking

Engineering

Android (Jetpack Compose), Kotlin, Firebase Authentication, Firestore, Firebase Storage, REST APIs

Tools

Figma, Android Studio, GitHub, VS Code, Google Play Console, Adobe Photoshop, Adobe Illustrator

---

FOUNDER EXPERIENCE

Founder & Product Builder – SeekExperts

India | 2025 - Present

- Built and shipped SeekExperts as a solo founder after identifying gaps in local service discovery.
- Designed the complete seeker / expert workflow including job posting, applications, bookings, and reviews.
- Built the Android app using Jetpack Compose with a focus on usability and performance.
- Designed and implemented backend infrastructure using Firebase Authentication, Firestore, and Cloud Storage.
- Made product, UX, and technical decisions under time and resource constraints to move the product forward.
- Released and managed production builds via Google Play Console and iterated based on real usage.

PROFESSIONAL EXPERIENCE

UI/UX & Graphic Designer - CyberSec Consulting

Remote, India | August 2024 - Present
- Designed UI/UX for web products in collaboration with developers.
- Created digital marketing creatives and motion assets aligned with product goals.

UI/UX & Graphic Designer - Techmatic Systems

Hyderabad, India | November 2023 - July 2024
- Served as the sole UI designer supporting multiple development teams.
- Designed application interfaces, marketing creatives, and motion graphics across products.

Freelance Designer & Developer

India | Dec 2021 - Present
- Delivered UI/UX design and frontend solutions independently from requirements to delivery.

EDUCATION

Bachelor of Engineering (B.E.) in Civil Engineering
All India Shri Shivaji Memorial Society College of Engineering, Pune
2019 - 2023 | GPA: 9.07

LANGUAGES

English, Hindi, Marathi
